---

## SUMMARY

UX Designer & Strategist with 7+ years closing the loop between what users do and what teams ship. I instrument platforms with Pendo, synthesize behavioral and qualitative data, and deliver Figma-ready decisions — orchestrating across research, design, and engineering. Stack-agnostic, signal-driven, AI-assisted across the full loop.

---

## CORE SKILLS & TOOLS

|                                  |                                                                                                           |
|----------------------------------|-----------------------------------------------------------------------------------------------------------|
| <b>Behavioral Analytics:</b>     | Pendo · GA4 · Custom Event Tagging · Funnels · Session Replay · In-App Guides · HEARTS framework          |
| <b>Design &amp; Prototyping:</b> | Figma (Auto Layout, Variables, AI, Make) · Miro · FigJam · Spline · Unity · Hi-Fi Prototyping             |
| <b>UX Research:</b>              | Contextual Inquiry · Heuristic Audit · Maze · Useberry · Qualtrics · Usability Testing · Optimal Workshop |
| <b>CRO &amp; Data:</b>           | Funnel Analysis · Drop-off Diagnosis · MS Dynamics · Qualtrics · Airtable · Excel                         |
| <b>AI Workflow:</b>              | Claude · Claude Code · Copilot Studio · Figma AI · Figma Make · v0 · Bolt · Lovable · Replit              |
| <b>PM &amp; Handoff:</b>         | Jira · Confluence · ADO · Figma Dev Mode · Stakeholder Communication · Team Leadership                    |

## EXPERIENCE

### Globant

Oct 2023 – Present · Hybrid · Córdoba

*Sr. UX Designer & Strategist — Behavioral Analytics Lead*

### Ernst & Young · EY Fabric — Internal Developer Portal (XDA Team)

- Sole **Pendo practitioner** on the XDA team — instrumented a **300+ item** shared catalog end to end; closing the loop between experience, product, and engineering with no cross-discipline handoffs.
- Ran end-to-end UX research on **90+ internal assets** using Microsoft Dynamics and Copilot Studio, converting sentiment analysis into a prioritized product backlog.
- Operationalized **behavioral analytics** for growth: funnels, drop-offs, and adoption monitoring with **Pendo + Qualtrics** on a platform migration.
- Designed Qualtrics dashboards combining behavioral + qualitative data — 360° measurement layer connecting what users say with what users do.
- Used Figma AI and Figma Make to accelerate prototype generation and stakeholder presentations with the design system already connected.

### Blockchains Inc. — 3D Immersive Map Platform

- Translated mobile-first spatial UI to desktop; pioneered a **2D/3D map** feature validated through client-led user testing — Figma prototypes bridged to 3D tools (Spline, Unity, Three.js).
- Designed immersive product UX for an owner → visitor loop — place POIs in a live 3D city, publish media, and prototype across spatial and flat surfaces.

## Applaudo Studios

Sep 2021 – Jul 2025 · Remote · Ext. Consultant

*Sr. UX Designer — Research, Instrumentation & Systems*

**Chek** — *Virtual Credit Card · South America (Acquired by Banco Ripley)*

- Led a 4-designer team to launch a virtual credit card — **+15% onboarding rate** via Maze-validated flows and Pendo event-tracking funnels.
- Built event-tracking funnels to measure feature adoption, informing post-launch iterations.
- Overhauled the design system across **10+ product features**: component libraries, token structures, and handoff documentation.

**Dollarama · DollarCity** — *Fraud Monitoring SaaS · Retail Chain (Canada & LATAM)*

- Reduced task completion time by **50%** through contextual inquiry, heuristic audits, and Useberry testing — redesigning core reviewer workflows end to end.
- Identified **3 new user personas**, reshaping navigation architecture and feature prioritization across Reviewer, Senior, and Auditor roles.

**General Directorate of Customs, El Salvador** — *Digital Transformation · Government*

- Digitized **50+ analog processes** into one unified surface — document work to field control, dual devices at the gate.
- Secured client trust to expand into a **\$500K full-scale project**. Managed 5 designers converting flows and sitemaps into developer-ready prototypes.
- Directed PrimeNG design system adoption and customization in Figma, applying brand guidelines across all screens.

**Applaudo Forecast** — *Workforce Management Platform · Internal · Global*

- Designed UX architecture for 4 modular workforce planning modules — pending assignments, timeframes, employee management — inside an established design system with zero new DS components and clean handoff throughout.

## Taxsynapse

Mar 2021 – Oct 2022 · Remote

*Lead Product Designer*

- Led end-to-end design of **3 SaaS platform MVPs** for Argentine government clients (Buenos Aires, Jujuy, Misiones), aligning tech flows, user flows, and sitemaps with stakeholder validation.
- Shipped a scalable design system that reduced iteration cycle time by **20%**.
- Validated prototypes via user testing, ensuring compliance with public-sector usability standards.

## EDUCATION

---

### Bachelor in Industrial Design

Universidad Nacional de Córdoba, Argentina

2020 — Foundation in systems thinking, human factors, and process-oriented design.

### Certifications & Courses

- Interaction Design Foundation — UX Design from Scratch · Design Thinking · HCI · User Research Methods
- HAZ! — Product Design Program
- Uxcel — UX/UI Foundations
- Design Labs — Advanced UX Course

## LANGUAGES

---

**Spanish** — Native

**English** — C2 Proficient
